

## Software Developer

Hybrid

Gurugram/Bangalore, India

### Description

At Vigyapan Mart, innovation and technology drive our ability to create impactful marketing solutions. We are seeking a motivated and talented Software Developer to join our team. As part of this role, you will work on cutting-edge projects and contribute to building scalable software solutions that meet business and customer needs.

Under this job role, you will collaborate closely with our experienced development team, engage in the full software development lifecycle, and gain practical exposure to modern programming practices, tools, and frameworks. This is an excellent opportunity to enhance your skills while working on impactful projects in the tech space.

If you are passionate about software development, eager to learn, and ready to tackle challenges in a collaborative environment, we want to hear from you!

---

### Responsibilities

- Strong understanding of web frontend technologies, with the ability to translate design and product requirements into high-quality user interfaces.
- Hands-on experience in building dynamic and responsive frontend pages using Nuxt.js, Vue.js, JavaScript, HTML, and CSS.
- Good working knowledge of Docker systems, containerised environments, and deployment workflows.
- Experience working with CI/CD pipelines for automated build, testing, and deployment.

- Ability to effectively leverage AI tools for coding, with past work demonstrating strong context engineering and AI-assisted development skills.
  - This is an Individual Contributor (IC) role; the candidate should exhibit strong ownership, discipline, and the ability to independently deliver features as per the predefined product roadmap.
  - High-level architectural understanding of software systems, design patterns, API interactions, and scalable application structures is preferred.
- 

## Requirements

- Have a degree in Computer Science, Software Engineering, or a related field.
  - 2-4 years of experience working on SaaS projects.
  - Proficiency in programming language(s). (e.g., Python, Java, JavaScript, etc.).
  - Familiarity with web technologies (HTML, CSS, JavaScript) Strong analytical skills and ability to solve problems effectively.
  - Knowledge of software development tools such as Git and debugging tools.
  - Excellent attention to detail and organizational skills.
  - Ability to work independently and collaboratively in a fast-paced environment.
  - Positive attitude, eagerness to learn, and a proactive approach to challenges.
  - Strong preference for candidates who are full-stack developers and have hands-on experience in React and Spring Boot.
  - Proficient in conducting regular code reviews to ensure quality and best practice.
  - Have the ability to mentor other developers and interns as a team.
  - Skilled in conducting regular code reviews to maintain high coding standards.
  - Has previous experience working with CI/CD pipelines and DevOps tools.
  -
- 

## Benefits

- Competitive compensation aligned with industry standards.
- Flexible hybrid work-from-home policy.

- Hands-on working with experienced professionals in a collaborative environment.
  - Exposure to real-world projects and scalable systems development.
- 

At Vigyapan Mart, we are committed to creating an inclusive workplace. We provide equal employment opportunities without regard to age, gender identity, sexual orientation, race, religion, disability, or any other non-merit factor.

We look forward to welcoming innovative and enthusiastic individuals to our team!
