SUMMARY

ReactJS Developer with 2 years of experience building responsive web applications using React.js, Next.js, and TypeScript. Skilled in API integration, AWS services (S3, Lambda, CloudFront), and containerized CI/CD pipelines with Docker. Leveraged UI optimizations to reduce game upload time by 80% while enhancing performance and scalability. Passionate about delivering secure, high-performance digital solutions.

TECHNICAL SKILLS

- **Frontend**: React.js, Next.js, Typescript, Javascript (ES6+), Vue.js, API Integration
- **State Management**: React Hooks, Redux, Redux Toolkit, Context API, React Router, Pinia
- **Styling & UI**: HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, Formic, Vuetify
- **UI/UX Optimization**: Cross Browser Compatibility, Reusable Components, Responsive UI Development, Lazy Loading
- **Backend**: Node.js, Express.js, PostgreSQL, MongoDB, Prisma ORM, REST APIs
- **Tools & DevOps**: Webpack, Babel, NPM, Git, GitHub, Bitbucket, Docker, CI/CD Pipelines, Azure, AWS Services
- **Testing & Agile**: Jest, React Testing Library, Vitest, Jira, Scrum

WORK EXPERIENCE

SYMB Technologies   Oct 2023 - Nov 2024
Software Engineer

- Contributed to the AcePlus.in admin dashboard using React.js and API Integration by integrating backend services, optimizing data handling, and improving overall workflow efficiency to support smooth application management.
- Developed a game management system with React Hooks and intuitive drag-and-drop controls, optimizing content organization and reducing game upload time by 80%.
- Developed RESTful APIs for CRUD operations using Node.js, which improved frontend-backend connectivity and enhanced data management efficiency
- Integrated RESTful and GraphQL APIs to enable efficient data fetching, streamlined client-server communication, and improved application scalability.
- Upgraded ASU Chat LP from Vue 2 to Vue 3, enhancing performance, maintainability, and user experience.

Ombrellainsure.com   Nov 2024 - Jun 2025
Front-end Developer

- Built the complete gadget insurance module for Ombrella, including the landing page, quote generation flow, and insurer listing using Next.js, React.js, Material UI, Bootstrap, and Context API, delivering a seamless and responsive user experience.
- Optimized Docker image size via multi-stage builds, automated CI/CD pipelines with AWS CodePipeline runners for dev, staging, and production, and enhanced deployment efficiency.

Upwork (Freelance)   Jun 2025 - Present
Software Dev

- Engineered a scalable full-stack music streaming platform using Next.js, TypeScript, React, Tailwind CSS, Express.js, Prisma, and PostgreSQL; implemented secure JWT authentication, Cloudinary integration, and real-time audio player to enhance user experience, resulting in a responsive UI with modular architecture and custom hooks. Deployed on Vercel with optimized performance, improving uptime and speed
- Developed the entire e-commerce website for Silanyas using Next.js, React.js, Redux, and Tailwind CSS; implemented authentication and authorization with Firebase, and integrated PhonePe payment gateway, enhancing transaction efficiency and resulting in increased user engagement and smooth financial operations

EDUCATION & CERTIFICATIONS

                                                              2019 - 2023
Bachelor Of Technology

- **Coursework:** MERN Stack Development - The Complete Guide

CERTIFICATION

- **MERN Stack Development - The Complete Guide (Udemy):**Bachelor Of Technology (2019 - 2023)
- **Microsoft Certified Azure Fundamentals. AZ-900:**Major : Computer Science & Engineering (JHU)
